

1. Login Twitter And Goto **Twitter Application Management** And Click Create New App

 Application Management

Twitter Apps

You don't currently have any Twitter Apps.

Create New App

2. Fill The Details And Create Twitter Application

Create an application

Application Details

Name *

Mean Online Shop App

Your application name. This is used to attribute the source of a tweet and in user-facing authorization screens. 32 characters max.

Description *

Mean Stack Online Shop Web Application

Your application description, which will be shown in user-facing authorization screens. Between 10 and 200 characters max.

Website *

http://127.0.0.1:9090

Your application's publicly accessible home page, where users can go to download, make use of, or find out more information about your application. This fully-qualified URL is used in the source attribution for tweets created by your application and will be shown in user-facing authorization screens.

(If you don't have a URL yet, just put a placeholder here but remember to change it later.)

Callback URL

http://localhost:9090/auth/twitter/callback

Where should we return after successfully authenticating? [OAuth 1.0a](#) applications should explicitly specify their `oauth_callback` URL on the request token step, regardless of the value given here. To restrict your application from using callbacks, leave this field blank.

Developer Agreement

☒ Yes, I have read and agree to the [Twitter Developer Agreement](#).

Create your Twitter application

3. After That Mean Online Shop App With Twitter Is Created With Consumer Key And Consumer Secret

Your application has been created. Please take a moment to review and adjust your application's settings.
